SEVENTH ANNUAL REPORT.

OFFICE OF STATE BOARD OF LAND COMMISSIONERS.

HELENA, MONTANA, December 1, 1897.

In accordance with the Provision of Section 3505 of the Political Code the State Board of Land Commissioners herewith submits its Seventh Annual Report.

At the beginning of the fiscal year 1897, the State Land Department was greatly hampered in the leasing of lands by the excessive appraisements of the past, which, by reason of the minimum rate of 5 per cent. of the appraised value required by law to be charged for leasing, placed it beyond the reach of the farmer and stockman, and deprived the State of much rental that might otherwise be secured. This appraisement the Board had no authority to change, except to make a reduction of 10 per cent. per annum, which, considering the exorbitant appraisement afforded but little relief.

By enactment of the Fifth Legislative Assembly the Board was authorized to have re-appraised all lands which it believed to be appraised too high, and was also empowered to appoint three assistant Land Agents to assist in the work of appraising and selecting lands. To further facilitate this work, tracings were secured of all the township plats (about 1,000 in number) which were not on file in the State Land Office.

As early as the weather would permit, the three assistants were placed in the field, and during the year the counties of Gallatin, Beaverhead, Flathead, Sweet Grass, Park, Carbon, Yellowstone, Dawson, Fergus and part of Missoula have been appraised. The re-appraisement bringing about a reduction of the rentals to be charged, has resulted in the leasing of much land heretofore returning no revenue to the State.

While engaged in the work of appraisement, the Land Agent and his assistants have reported to the Board all tracts of available land which they believed desirable for the several grants. In this way 42,285.04 acres have been selected during the year. The selections made are mostly such lands as are valuable for their timber, for agricultural purposes, or first class grazing lands having a permanent supply of water.

Numerous petitions have been received asking for the selection of large tracts of grazing lands, but the Board feels convinced that only such grazing lands should be selected as contain stock water or are situated near a large stream that will afford the means of irrigation in the future.

Rather than select inferior grazing lands, the Board has endeavored to secure lands in the western part of the State having a valuable growth of saw timber. During the year, 5,440 acres of heavily timbered lands in Flathead county have been filed upon; 10,600 acres have been selected in Missoula county, being heavily timbered, that are now awaiting the approval of the Surveyors plats by the General Government. Application has also been made by the Board for the survey of five townships of timbered lands in the western part of Missoula county.

CONCLUSION.

The incoming year will witness the complete appraisalment of all the State lands, with a material increase of selections to the credit of the several Grants yet remaining unsatisfied. In addition to the 204,131.74 acres to be selected for the several grants, there are 43,155.34 acres of indemnity School lands to be selected in lieu of School lands lost to the State by reason of the prior rights established by settlers, making a total of 247,287.08 acres yet to be selected.

The board acknowledges itself indebted for much of the tabulated information appearing in this report to the very full and comprehensive reports made by the State Land Register and State Land Agent pursuant to the requirements of law.
